PADI Open Water Diver Course

The PADI Open Water Diver Course at Texas Dive Center is absolutely the best way to learn how to dive. We offer small personalized classes. By keeping our classes small, we can offer you a very informative and comprehensive program. This certification will allow you to go diving with friends and family anywhere in the world. The PADI Open Water Diver Course is the most recognized diving certification in the world.

Qualifications
The PADI Open Water Diver Course is designed for practically anyone that is in good health and comfortable in the water. The PADI Junior Open Water Diver Course is for divers between the ages of 10 and 14. Divers 15 and up receive the PADI Open Water Diver Certification.

What will I Learn
In the PADI Open Water Diver Course, you will learn the basics of SCUBA diving which includes equipment and diving techniques. You'll earn this certification by completing online academics, five pool sessions, and four open water training dives. Most of our open water training dives are conducted at local dive training sites (lakes).

How Long is the Course
The PADI Open Water Diver Course is performance based. You will complete the online academics at your own pace and when you are ready you will meet with your instructor and complete the pool (confined water) sessions and open water dives in one weekend. We also offer private course for people that require a more flexible schedule.

What Diving Equipment Will I Need
Texas Dive Center will furnish all the SCUBA equipment required for your PADI Open Water Diver Course. There is no extra charge for the use of rental equipment.
Each Student is responsible for their own mask, snorkel, fins, and boots. At Texas Dive Center, we have a large selection of equipment to choose from and each student receives a special student discount.

Course Price
Call Texas Dive Center at 281-741-9949 to discuss prices and which course will fit your needs.
Be Sure to ask your instructor about the PADI Master Scuba Diver Certification.

Notes:
